PROFESSIONAL SUMMARY

Full-stack developer with 4+ years of experience building production web applications with React.js, Next.js and Node.js (Express.js/NestJS) on MongoDB and PostgreSQL. I build admin panels, business websites and the APIs behind them: role-based access, secure authentication, headless CMSs, background jobs, notifications and reporting. Recent work includes a white-label app build-and-release portal with secrets management and CI/CD automation, and a production planning system for a manufacturer. I currently lead a small backend team and work closely with product managers, designers and QA in Agile sprints, and previously worked with teams in Toronto, Canada.

TECHNICAL SKILLS

Front-End: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, RTK Query, Tailwind CSS, Material UI, Bootstrap, Formik / Yup, HTML, CSS

Back-End: Node.js, Express.js, NestJS, RESTful API Design, MVC Architecture, Middleware, Joi / Zod Validation, Swagger / OpenAPI

Databases: MongoDB (Mongoose, Aggregation Pipeline), PostgreSQL (Prisma), MySQL, Redis

Auth & Security: JWT with httpOnly Refresh Cookies, Role-Based Access Control (RBAC), OAuth, TOTP 2FA, OpenBao (Secrets Management), GitHub OIDC, Rate Limiting, Input Sanitisation, NextAuth, Cognito

Real-Time & Jobs: Socket.io, Server-Sent Events, Firebase Cloud Messaging, Bull Queues, RabbitMQ, node-cron, Microservices

CMS: Strapi (Headless CMS), Custom Admin CMS, TipTap Rich-Text Editor

Cloud & DevOps: Docker, GitHub Actions, Jenkins (CI/CD), AWS (EC2, S3, SES, Lambda, Rekognition), Vercel, Netlify, Render, Git

Testing & Tools: Jest / Vitest (basic), Postman, Manual & Functional QA, Jira

AI-Assisted Development: Claude Code, Cursor, GitHub Copilot, ChatGPT for debugging, refactoring, documentation and test generation

PROFESSIONAL EXPERIENCE

MERN Stack Developer — Latitude Technolabs Pvt. Ltd., Ahmedabad *Sept 2025 – Present*

- Lead a backend team of 2 developers and contribute to admin panels and customer-facing front ends for clients in SaaS, manufacturing, healthcare, real estate and hospitality.
- Built the Branding Portal and Omega platforms end to end (see Projects): secrets management with OpenBao, CI/CD build automation with GitHub Actions, job queues, push notifications and reporting.
- Design MongoDB and PostgreSQL schemas and REST APIs with JWT authentication and RBAC on every endpoint, documented in Swagger/OpenAPI.
- Created reusable React components, middleware and RTK Query data layers that are shared across projects, cutting setup time for new client builds.
- Deliver business websites on Next.js and Strapi so clients can update their own content, with per-page SEO, sitemaps and responsive layouts.
- Work in Agile sprints with product managers, designers and QA; review code and plan sprint work for the backend team.

Software Developer — Digital Attractions (CN Tower), Toronto, Ontario *Aug 2023 – Apr 2025*

- Owned the full software development life cycle (SDLC) for customer-facing web applications.
- Built UI features with React.js and React-Redux and moved the front-end build to TypeScript for type safety and maintainability.
- Developed cross-browser, responsive single-page applications, custom components and layouts with Material UI.
- Integrated middleware and Redux-Promise to fetch data from back-end services and consume RESTful APIs.
- Prepared MySQL data for system, regression and end-to-end testing.

Front-End Developer — Harsh Infotech, Scarborough, Ontario *Jan 2022 – Jul 2023*

- Worked with back-end developers on requirements, data modeling and RESTful API design in a Node.js environment.

- Built responsive UI applications with HTML, CSS, JavaScript, Bootstrap, Material UI and React.js.
- Developed uni-directional data flow views with React.js and React-Redux, using Webpack for builds.
- Wrote service layers to store and retrieve data from MongoDB.

PROJECTS

Branding Portal — White-Label App Build & Release Platform *2026*

- Customers configure branding (identity, server, colours, artwork) for iOS, Android and desktop apps through schema-driven forms, then hand over, build and download signed installers.
- Integrated OpenBao (AppRole auth, write-only secrets), per-brand GitHub repositories via a GitHub App, and GitHub Actions pipelines with OIDC-verified callbacks and a watchdog for stalled builds.
- Owner/Member roles, email invitations, append-only audit log, English and German UI; deployed with Docker and nginx.

Tech: *React 19, TypeScript, Tailwind CSS, RTK Query, Node.js, Express.js, MongoDB, OpenBao, GitHub Actions, Docker*

Omega — Production Planning & Task Management (Admin Panel + API) *2026*

- Planning spreadsheet per lift order (tasks by department, primary/secondary workers, drag-to-reorder) with PPC Excel import and Ready-to-Dispatch sign-off.
- Cron-based delay sweeps, Firebase push notifications through a Bull queue, attendance and shift management with AWS Rekognition face enrolment.
- Department and worker productivity reports exported to Excel and PDF; four roles from Super Admin to Worker.

Tech: *React 19, Tailwind CSS, RTK Query, Node.js, Express.js, MongoDB, Bull, Firebase, AWS S3 & Rekognition*

MedEquip360 — Multi-Tenant Hospital Equipment Management *2026*

- Asset register with QR tag batches, a breakdown service-request workflow with vendor outsourcing, preventive maintenance and spare-stock alerts.
- Seven roles with a permission matrix, TOTP two-factor login, audit trail, and KPI reports (downtime, MTTR, PM compliance).

Tech: *React, TypeScript, Tailwind CSS, RTK Query, Express 5, PostgreSQL, Prisma, Zod, AWS S3*

Green Monkey — Property Services Operations Platform (Admin + Property-Manager Portal) *2026*

- Violations, complaints and junk-removal workflows for apartment communities, with photo evidence, tracking timelines, PDF export and configurable escalation rules.
- Employee schedules and timesheets with location checks against a property radius; notification microservice on RabbitMQ for push, web push and email.

Tech: *React, TypeScript, Redux Toolkit, Tailwind CSS, Node.js microservices, MongoDB, RabbitMQ, AWS S3 & SES, Docker*

Business Websites with Headless CMS *2025 – 2026*

- **Adroit Connect Hospitality** (adroitconnecthospitality.com): Next.js and TypeScript site with about 20 Strapi content types (services, projects, hotels, blog, gallery, team) managed by the client.
- **Aaradhya Building Solutions** (absmep.com): React and Strapi site for an HVAC/MEP contractor with product, service and quote-request pages.
- **Yellow Sapphire Real Estate**: public website, admin CMS and API for a Dubai leasing company: property search, lead management with CSV export, per-page SEO, JSON-LD and sitemap.

EDUCATION

Advanced Diploma — Computer Systems Technology, Centennial College, Toronto *2020 – 2021*

Bachelor of Technology (B.Tech.) — Computer Engineering, CHARUSAT University *2015 – 2019*

ADDITIONAL STRENGTHS

- Strong debugging, performance tuning and root-cause analysis across front end, API and database.
- Code review and sprint ownership; mentoring junior developers.
- Use AI-assisted tools to speed up coding, debugging and documentation while keeping code reviewed and maintainable.
