

Kuldip Boghara

MERN Stack Developer

3+ Years

PROFESSIONAL SUMMARY

Skilled MERN Stack Developer with 3+ years of professional experience designing, developing, and maintaining scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Strong expertise in building RESTful APIs, implementing secure authentication systems, and developing dynamic frontend interfaces with reusable React components. Hands-on experience with database design, state management, admin panel development, and deployment workflows. Experienced in Agile/Scrum environments, collaborating with cross-functional teams to deliver production-ready applications. Focused on writing clean, maintainable, and efficient code across the full stack.

TECHNICAL SKILLS

- **Frontend:** React.js, Redux Toolkit, Context API, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI
- **Backend:** Node.js, Express.js, REST API Development, MVC Architecture, Middleware Development
- **Database:** MongoDB, Mongoose ODM, Aggregation Pipeline
- **Authentication & Security:** JWT Authentication, Role-Based Access Control (RBAC), OAuth, API Security Best Practices
- **Admin Panel Development:** Dashboard Design, CRUD Management Systems, Analytics Modules
- **DevOps & Tools:** Git, GitHub, Postman, Docker (Basic), CI/CD Basics
- **Deployment:** Vercel, Netlify, Render, AWS (EC2 Basics)

PROJECTS UNDERTAKEN

Global Recruitment – Recruitment Platform (Frontend + Backend + Admin Panel)

Designed and developed a full-stack recruitment platform enabling job posting, candidate applications, and admin management. Built RESTful APIs using Node.js and Express.js for user management, job listings, and application workflows. Developed responsive frontend using React with dynamic routing and state management. Implemented JWT authentication and role-based access control for Admin, Recruiter, and Candidate roles. Designed MongoDB schemas for scalable data management and optimized queries for performance. Built a dedicated admin dashboard for managing users, job posts, and reports.

Tech Used: MongoDB, Express.js, React.js, Node.js, JWT, Redux Toolkit

ANRA News – News Platform (Frontend + Backend + Admin Panel)

Developed a full-stack news management platform with article publishing, categorization, and content moderation features. Built secure REST APIs for article CRUD operations, category management, and user roles. Created responsive UI using React with reusable components and dynamic content rendering. Implemented admin panel for managing news articles, users, banners, and featured content. Designed MongoDB schema with indexing strategies for optimized search and filtering. Integrated role-based authentication for content editors and administrators.

Tech Used: MongoDB, Express.js, React.js, Node.js, JWT, Mongoose, Redux Toolkit

PROFESSIONAL EXPERIENCE

MERN Stack Developer – Latitude Technolabs Pvt. Ltd. | Sept 2025 – Present

- Designed and developed full-stack applications using MongoDB, Express.js, React.js, and Node.js.
- Built and consumed RESTful APIs for internal and third-party integrations.
- Developed dynamic React components and implemented state management using Redux Toolkit.
- Designed MongoDB schemas and optimized aggregation queries for performance.
- Implemented JWT-based authentication and role-based access control.
- Built admin dashboards with analytics and management features.
- Collaborated with frontend, QA, and DevOps teams in Agile/Scrum workflows.
- Participated in code reviews and ensured clean coding standards.
- Assisted in deployment and production monitoring.

Software Developer – Digital Attractions (CN Tower) | Toronto, Ontario | Aug 2023 to Apr 2025

- Involving the Complete Software development life cycle (SDLC) to develop the application.
- Use React.js and React-Redux in UI Development.
- Developing cross-browser and multi-browser compatible web pages using HTML, CSS, JavaScript, jQuery, JSON, and Ajax.
- Upgrade the front-end build system to use TypeScript.
- Using Middleware, Redux-Promise in application to retrieve data from the back-end and to also perform RESTFUL services. Conducted data prep activities for system testing, and regression testing end-to-end testing using MySQL.
- Working on creating responsive single page application, grid, custom buttons, and all layouts using Material UI.
- Work on client frameworks for caching and develop reusable components.
- Creating Business Flow Diagrams, Dataflow diagrams, UML Activity diagrams, and Sequence diagrams using MS Visio.

Front-end Developer – Harsh Infotech | Scarborough, Ontario | Jan 2022 to Jul 2023

- Involved in a Waterfall based approach to UI Development.
- Worked closely with back-end developers for project requirements and analysis, helped manage data in the database, and created RESTful APIs in the Node.js environment.
- Developed User Interface web applications using Front End Technologies like HTML, CSS, JavaScript, Bootstrap, Material-UI Design, React-Bootstrap, React Strap, and React JS.
- Used Typescript to generate client-side JavaScript Code.
- Created and maintained the company website using React and Semantic UI.
- Developed rich views using React.js with React-Redux architecture for the Uni-directional data flow with the web-pack build tool.
- Wrote services to store data and retrieve user data from MongoDB for the application.
- Used Git, SVN for Version controlling, error reporting, and project management tools Jira.

EDUCATION

BTECH – Computer Science – CHARUSAT University (2015 – 2019)

ADDITIONAL SKILLS

Collaboration & Communication: Cross-functional Team Coordination, Client Interaction, Documentation

Problem-solving: Debugging, Performance Optimization, Root Cause Analysis

Leadership: Code Reviews, Sprint Ownership, Mentoring

Time Management: Delivered full-stack modules within tight deadlines
