

KULDIP BOGHARA

Full-Stack Developer | React.js • Node.js • MongoDB

Ahmedabad, Gujarat | +91 9106911156 | bogharakuldip@gmail.com | kuldip-boghara-portfolio.vercel.app

PROFESSIONAL SUMMARY

Full-stack developer with 3+ years of experience building scalable, production-ready web applications using React.js and Node.js (Express.js/NestJS), with strong MongoDB data modeling expertise. Proven ability to design and consume RESTful APIs, implement secure JWT-based authentication and role-based access control, and integrate React front-ends with server-side logic for seamless end-to-end functionality. Comfortable working in Agile/Scrum environments, collaborating closely with product management, engineering teams, and UX/UI designers to define and ship features with attention to detail, design principles, and user-centric thinking. Experienced with Tailwind CSS, Bootstrap, and Material UI for responsive, component-driven front-end development.

TECHNICAL SKILLS

Front-End: React.js (Hooks, Component Patterns, State Management), Redux Toolkit, JavaScript (ES6+), HTML, CSS, Tailwind CSS, Bootstrap, Material UI, TypeScript, RTK Query, Next.js

Back-End: Node.js, Express.js, NestJS, RESTful API Development, MVC Architecture, Middleware Development

Database: MongoDB, Mongoose ODM, Aggregation Pipeline, MySQL, PostgreSQL

Auth & Security: JWT Authentication, Role-Based Access Control (RBAC), OAuth, API Security Best Practices, NextAuth, Cognito

Real-Time & Architecture: Socket.io, WebSockets, GraphQL, Redis (Caching), Microservices Architecture

API Documentation: Swagger / Postman

Testing & QA: Unit Testing (Jest - basic), Manual/Functional QA

Tools & Deployment: Git, GitHub, GitHub Actions, Jenkins (CI/CD), Postman, Docker, Vercel, Netlify, Render, AWS EC2, AWS Lambda

AI-Assisted Deployment: Cursor, GitHub Copilot, ChatGPT, Claude, AI-assisted debugging, code generation, refactoring, documentation, test generation

PROFESSIONAL EXPERIENCE

MERN Stack Developer — Latitude Technolabs Pvt. Ltd.

Sept 2025 – Present

- Lead a backend team of 2 developers while also contributing to admin panel and user-facing frontend development as needed, ensuring consistent delivery across the full stack.
- Design and develop full-stack web applications using React.js, Node.js, Express.js, and MongoDB, integrating React user-facing elements with server-side REST APIs for seamless communication and data flow.
- Build and consume robust backend services and RESTful APIs for internal modules and third-party integrations, following MVC architecture and middleware best practices.
- Develop reusable, dynamic React components and manage application state using Redux Toolkit.
- Design MongoDB schemas and optimize aggregation queries for performance and scalability.
- Implement JWT-based authentication and role-based access control (RBAC) to secure application endpoints.
- Document REST APIs using Swagger/OpenAPI for internal and third-party integration reference.
- Collaborate closely with product management, engineering teams, and UX/UI designers in Agile sprints to define, design, and implement new features with user-centric thinking.

Software Developer — Digital Attractions (CN Tower), Toronto, Ontario

Aug 2023 – Apr 2025

- Owned full software development life cycle (SDLC) for customer-facing web applications.
- Built UI features using React.js and React-Redux, upgrading the front-end build system to TypeScript for improved type safety and maintainability.
- Developed cross-browser, responsive single-page applications, custom components, and layouts using Material UI.
- Integrated middleware and Redux-Promise to retrieve data from back-end services and consume RESTful APIs.
- Conducted data preparation for system, regression, and end-to-end testing using MySQL.

Front-End Developer — Harsh Infotech, Scarborough, Ontario

Jan 2022 – Jul 2023

- Collaborated with back-end developers on project requirements, data modeling, and RESTful API design within a Node.js environment.
- Built responsive UI applications using HTML, CSS, JavaScript, Bootstrap, Material-UI, and React.js.
- Developed rich, uni-directional data flow views with React.js and React-Redux, using Webpack for builds.
- Wrote service layers to store and retrieve data from MongoDB for application features.

PROJECTS

Global Recruitment — Recruitment Platform (Full-Stack + Admin Panel)

Live: globalhrllc.com

- Designed and built a robust recruitment platform supporting job posting, candidate applications, and admin management — owning the frontend, backend, and admin panel end-to-end.
- Seamlessly integrated a React front-end with a Node.js/Express REST API back-end and a dedicated admin panel for managing job listings and candidates.
- Implemented JWT authentication and role-based access control for Admin, Recruiter, and Candidate roles.
- Designed scalable MongoDB schemas and optimized queries for performance.

Tech: *MongoDB, Express.js, React.js, Node.js, JWT, Redux Toolkit*

ANRA News — News Platform (Full-Stack + Admin Panel)

Live: stage.qadam.com

- Built a full-stack news management platform with article publishing, categorization, and content moderation — owning the frontend, backend, and admin panel end-to-end, connecting a React UI to secure Node.js/Express REST APIs.
- Optimized MongoDB aggregation pipeline queries, cutting query response time by 40% for high-traffic article listing and search endpoints.
- Implemented role-based authentication for content editors and administrators; built an admin panel for managing articles and featured content.

Tech: *MongoDB, Express.js, React.js, Node.js, Mongoose, Tailwind CSS*

EDUCATION

Advanced Diploma - Computer System Technology – Centennial College, CA

2020 – 2021

Bachelor of Technology (B.Tech.) - Computer Engineering, CHARUSAT University

2015 – 2019

ADDITIONAL STRENGTHS

- Collaborated closely with product management, engineering teams, and UX/UI designers to define, design, and implement new features with attention to detail, design principles, and user-centric thinking.
- Strong debugging, performance optimization, and root-cause analysis skills.
- Code review ownership, sprint ownership, and mentoring of junior developers.
- Consistent track record of delivering robust, scalable modules within tight deadlines.
- Effectively leverage AI-assisted development tools to accelerate coding, improve code quality, simplify debugging, and automate documentation while maintaining engineering best practices.
